

## **UK Structured Products Association launches new product website for advisers**

26 February 2015: Today, the UK Structured Products Association (“UKSPA”) announces the launch of a free new website, hosting details of all members’ products currently in subscription. The website will allow financial advisers to search and compare different products more easily, by seeing key information for each offering in a concise and uniform format.

This website launch follows the recent initiatives from UKSPA to enhance the level of information available to advisers, via their Product Codes and Risk Ratings.

Zak de Mariveles, Chairman of UKSPA comments: “This simple and free-to-access website will allow advisers to have a detailed view of the UK structured products market. It will be *the* one stop shop where advisers can see all our members’ products and receive updates when new products are added, alongside gaining access to information such as monthly market updates, education around the various product payoffs and of course, information on the latest UKSPA Risk Ratings. We hope that advisers find the new website useful and informative.”

The website is available at [www.ukspassociation.co.uk/products](http://www.ukspassociation.co.uk/products) and it is aimed at financial advisers and other investment professionals only.

### **Note to Editors**

The UK Structured Products Association ('UKSPA') was first established in 2009 in response to a need for a collective and unbiased voice for the industry. Today, the association includes 13 members, who represent some of the largest providers and distributors of structured products to UK retail investors. The purpose of the association remains the same: To provide a useful, unbiased and responsive source of information, education and comment on structured products and their use in investors' portfolios.
